

Rectangular weights M1

Grip handle weights

MATERIAL:

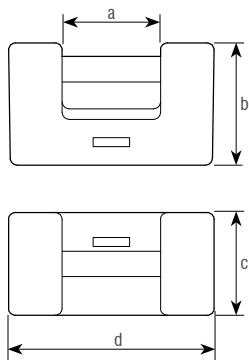

» Cast steel and stainless steel weights with monobloc construction to prevent weight loss and unhooking in case of accidental impact.

TRANSPORT:

» Rectangular precision weights ensure easy and safe transport thanks to a central bar for easy one-handed gripping.

CALIBRATION:

» The cast steel version has an upper fitting cavity for weight maintenance, allowing for proper calibration.

Weight in lacqued cast steel

Dimensions (mm)

Capacity	a	b	c	d
5 kg	80	66	77	152
10 kg	101	109	97	193
20 kg	112	139	117	234
50 kg	198	192	157	314

Weight in stainless steel

M1 Class	Code #	Capacity	Material	Certifications
				ENAC Code #
	260005	5	lacqued cast steel	901030
	260006	10	lacqued cast steel	901031
