

## Precision weights M1

Chrome-plated steel cylindrical M1. Individuals.

**MATERIAL:**

- » Chrome-plated steel weights with monobloc construction to prevent weight loss and unhooking in case of accidental impact.

**TRANSPORT:**

- » The larger cylindrical precision weights can be easily transported thanks to the weight-carrying accessory.

**STORAGE:**

- » They include an individual plastic case for durable storage, plus the option of an aluminium case for added security.

**CALIBRATION:**

- » Presence of an upper fitting cavity for weight maintenance, allowing for proper calibration.

Top adjustment cavity

\*Supplied with individual plastic case. Optional aluminum case accessory available.
