

Precision weights M1-F1

Stainless Steel cylindrical (M1, F1). Individuals.

MATERIAL:

- » Stainless steel weights with monobloc construction to prevent weight loss and unhooking in case of accidental impact.

TRANSPORT:

- » The stainless steel cylindrical precision weights can be easily transported thanks to the aluminium weight carrier accessory.

STORAGE:

- » They include an individual aluminum case that allows for easy storage as well as an added level of protection.

**Case included*
